

Missouri Department of Natural Resources
Public Drinking Water Branch
Minimum Design Standards for Missouri Public Water
Systems
Stakeholder Meeting

Location: DNR Conference Center
Bennet Springs Conference Room
1730 East Elm Street
Jefferson City, Missouri

Date & Time: October 11, 2012, 9 a.m. - noon

You are invited to participate in a discussion of the Public Drinking Water Branch's Minimum Design Standards for Missouri Public Water Systems. The Department is holding a meeting to discuss the 3rd revision to this document. The department anticipates that this will be the last version of the document offered for informal review before beginning the formal rulemaking process. The rulemaking process is expected to be initiated this fall and will include a formal public comment period and public hearing.

What is the Minimum Design Standards for Missouri Public Water Systems?

Once finalized, this document will provide minimum design standards and guidelines for the construction or modification of all public drinking water systems in the state. This document combines the department's Design Guide for Community Water Systems (2003) and Standards for Non-Community Public Water Supplies (1982).

What is this meeting about?

The purpose of this meeting is to discuss the 3rd revisions with stakeholders prior to beginning the rulemaking process.

Where can I get more information?

If you have any questions or would like more information you can access the design guide revisions page directly at <http://dnr.mo.gov/env/wpp/pdwb/permits.htm> or contact Ryan Seabaugh at 573-751-8628 or at P.O. Box 176, Jefferson City, MO 65102-0176.
